■ Article 25. WEATHER CONDITIONS

In case of adverse weather conditions, the organization reserves the right to neutralize the race, modify the course, the disqualification times, the start time of the race, or even cancel it, following the recommendations of the 112 Emergency Services (GVA). An alternative route of 35.7 km and 3040+ is planned in case it is necessary.

The non-celebration of any event due to the reasons stated in the previous section will not give the right to a refund of the registration fee, and the organization will be responsible for finding an alternative date.

SAFETY AMENDMENT ARTICLE 25

Under Article 25, the parameters for modifying or suspending the race are established, considering any normal alterations to the event. The following reasons are taken into account: weather conditions, flooding, fire, major disasters, and others. Modifications, adaptations, and/or the cancellation of any part of the course, or even the total suspension of the event, will be determined through a meeting at the event's security command post, with the urgency level corresponding to the need. The decision made by this crisis committee will be final and must be followed by all runners and/or event collaborators, adhering to the pre-established evacuation and modification/suspension plan.

Weather-related Reasons

The event will proceed as planned if there are no alerts or **pre-emergency** levels issued by the 112 Emergency Services (GVA).

If the 112 Emergency Services center establishes a **yellow** pre-emergency level, the potential impact on the race will be assessed, and modifications or adjustments to parts of the course may be necessary.

If the 112 Emergency Services center establishes an **orange** pre-emergency level, the organization may modify the route before or during the race to guarantee the safety of the runners and preserve their physical integrity, even considering suspension if the weather conditions worsen.

If the 112 Emergency Services center establishes a pre-emergency level, in coordination with security services and other law enforcement agencies, the organization reserves the right to cancel the race, even if it is in progress, to guarantee the safety of the runners and preserve their physical integrity.

If the 112 Emergency Services center establishes a **meteorological emergency** level, the event will immediately be **CANCELED** in all cases without exception.

Flooding Reasons

If weather conditions indicate a risk of flooding in areas near the river/stream, or if this area becomes flooded due to weather, given its proximity to the finish line, the organization reserves the right to modify and move the finish line to a higher part of the village.

The exact location will be decided in an emergency meeting with the race management and the event's security officials, with Diputación Street being one of the main options, provided other conditions do not dictate the partial or total suspension of the event.

Fire-related Reasons

In the event of a fire occurring before or during the race in the racecourse area, the race will be immediately suspended to ensure proper evacuation of runners and volunteers in the mountains, prioritizing their safety and physical integrity.

Evacuation routes will be established depending on the fire's position, and security

personnel will be responsible for indicating escape routes and ensuring the safety of the runners.

The Event Command Post (PMA) will determine which evacuation routes should be used, depending on the conditions.

Major Disaster Reasons

In the event of a major natural or man-made disaster that could affect the normal course of the race, endanger the physical integrity of runners, volunteers, and/or race participants, the organization reserves the right to immediately neutralize and/or suspend the race if the circumstances require it. Examples include: landslides, explosions, road closures, earth movements affecting people and/or material...

Other Emergencies

Any incident beyond the control of the event organization that the organization deems poses a risk to participants, volunteers, and race attendees, and has an uncontrolled magnitude, will lead to the necessary response measures.

Article 26. DISQUALIFICATION AND PENALTIES

The organization will monitor the application of the rules, and its members will be authorized to disqualify runners if:

- They cut the course by taking a shortcut.
- They receive assistance outside the designated aid stations.
- They leave trash on the course (we will be very strict on this; the penalty will result in disqualification and a lifetime ban from participating in the event).
- They fail to assist a person in difficulty (injury, severe exhaustion, hypothermia, etc.).
- They do not pass through a control point.
- They leave a control point after the disqualification time.
- They transfer their bib number to a third party.
- They harm the health of another runner or a member of the organization.
- They fail to wear the bib number clearly visible.

Other penalties:

- Failing to carry the required mandatory equipment when passing the material control.
- Receiving assistance outside the designated areas.

We will be very strict with disqualifications and penalties. We believe that each and every runner should compete under the same conditions (except for physical condition, which depends on the individual).

In addition to this regulation, the race will be governed by the competition rules of the ISF and the Merrell Skyrunner® World Series (MSWS), managed by SkyMan SA, and in accordance with the regulations of the International Skyrunning Federation (ISF):
